Profile

AWS Certified Solutions Architect with hands-on experience building cloud-native backends, RAG AI pipelines, and full-stack applications in production. For more details, visit **amankeshri.com**

Experience

Shiv Cement Store Aug 2025 – Feb 2026
Contract Backend & AWS Cloud Engineer *Patna, Bihar*

- Designed and deployed a full-stack business platform for one of **Bihar's best-selling cement sellers**, serving product catalogue, quotations, and staff management across web and mobile.
- Built and deployed a **Node.js + Express** REST API on **AWS Elastic Beanstalk** with **AWS S3** (ap-south-1) for product image storage using IAM-scoped presigned URLs — zero binary data handled by the server.
- Integrated **OpenAI GPT-4o** with **Amazon OpenSearch Service** (vector RAG pipeline) and **Amazon ElastiCache (Redis)** for query caching, reducing repetitive LLM API calls by 60% for FAQ-type queries.
- Engineered a tamper-proof attendance system combining GPS geofencing (Haversine), rotating **QR tokens**, and **JWT** role-based auth — eliminating proxy attendance entirely.
- Delivered three production-grade products: a **Next.js 14** customer website (Vercel), an **Expo React Native** admin APK, and the backend API — all within contract timeline.

Technosys IT Management Private Limited Feb 2025 – Aug 2025
Cloud & Full Stack Engineering Intern *Remote*

- Led migration of a client web application to **AWS**, provisioning **EC2**, configuring **Route 53 DNS**, and securing infrastructure using IAM roles and Security Groups.
- Deployed scalable backend services on EC2 with Nginx and implemented monitoring using **CloudWatch**, improving uptime by 15%.
- Built and optimized REST APIs (Node.js + Express) and improved load time by 25% through caching and modular architecture.
- Implemented CI/CD workflows using GitHub Actions and Docker for streamlined deployments and version-controlled releases.

Technical Skills

Cloud: AWS (EC2, Lambda, S3, IAM, DynamoDB, VPC, CloudWatch, Elastic Beanstalk, ElastiCache, OpenSearch, Security Groups)
DevOps: Docker, GitHub Actions, Jenkins, Nginx, Linux Administration
Languages: JavaScript, TypeScript, Python, Bash
Databases: MongoDB, PostgreSQL, DynamoDB, Redis
Frameworks: Node.js, Express.js, Next.js, React Native (Expo), REST API Design

Certifications

AWS Certified Solutions Architect – Associate (SAA-C03) *Feb 2026*
CODEATHON – 3rd Place Winner | *JSSATE, Bengaluru* *Mar 2023*

Projects

AI-Powered Alexa Assistant | ***AWS Lambda, DynamoDB, Node.js, CloudWatch*** Dec 2025
Cloud & Backend Engineer

- Built a serverless Alexa Skill using **AWS Lambda**, integrating OpenAI APIs for real-time conversational AI responses.
- Implemented **DynamoDB** for session persistence and secured secrets using **AWS Systems Manager Parameter Store**.

Education

JSS Academy of Technical Education Bangalore, KA
Bachelor of Engineering in Computer Science *2021 – 2025*
